

## COMPANY **DECK**

**As of now we are only in Singapore**

**[www.uautomate.com.sg](http://www.uautomate.com.sg)**

**#03-92, Oxley Bizhub, Singapore**

# WHAT **WE DO?**

We design and deploy production-ready AI systems that combine large language models, autonomous agents, and workflow orchestration so that you can run your business with AI. We also embed AI intelligence on top of your existing tools – CRMs, apps, kiosks, and websites – without rebuilding your systems.

## Our services

### **1. AI STRATEGY DEVELOPMENT**

We help businesses understand how you can adopt and deploy human-centric AI systems with clarity, structure, and long-term reliability.

### **2. AI PRODUCT DEVELOPMENT**

We develop AI-powered tools tailored to solve your specific business challenges and deliver measurable outcomes.

### **3. RAG AI DEVELOPMENT**

Empowering Business decisions makers to turn business data into intelligent AI-driven answers

### **4. DATA & LLM ENGINEERING**

We help you fine-tune AI models using your specific business data to make them more accurate and relevant to your operations.

### **5. CONVERSATIONAL AI**

Delivering custom AI Automation on Insta, WhatsApp, AI ChatBots or AI Voice Solutions that communicate naturally and provide instant, helpful responses to your customers.

# ABOUT US

---

- We are a team of AI engineers, developers, and practitioners building production-ready AI systems that solve real business problems.
- We combine deep technical expertise with practical business understanding to design AI that works in real-world operations.
- Our goal is simple: deploy AI that enhances human capability, not just automate tasks. We help businesses adopt and deploy AI with clarity, structure, and long-term reliability.

# OUR PORTFOLIO

Our ready to use SAAS Products

01

**AI Meal Tracking:** An AI-powered web & mobile app that calculates your calorie and protein needs and uses smart meal scans to help prevent overeating and weight gain made for fitness industry and nutritionist

02

**AI Home Space Design:** A simple, no-code app that helps people see how their home will actually look before spending money on renovations or furniture.

Users can pick a room, change wall colors, flooring, tiles, furniture, and layouts – and instantly see realistic visuals of the space.
